

About the Winter School - Animal Biotechnology 2020

Dear Participants and Colleagues,

We are very pleased to welcome you on the 7th International Winter School „**Animal Biotechnology 2020**“. The Winter School is organized by the Research Institute for Animal Production Nitra, National Agricultural and Food Centre in cooperation with the Faculty of Biotechnology and Food Science and AgroBioTech Research Centre Slovak University of Agriculture Nitra.

The aim of the winter school is presentation of an actual research from the field of animal biotechnology, with a special focus on *Animals as a biological model for biotechnological research (genetics, reproduction, nutrition, welfare, health conditions, physiology,...)*

Moreover, the winter school will provide an opportunity to gather researchers engaged in this and adjacent fields of research in order to exchange their skill and experience as well as to establish potential collaboration in a given task. We would appreciate attendance and participation on this winter school of colleagues from various research institutions and universities.

We wish you cordial and warm atmosphere at our winter school for presentation, creative and fruitful discussion and inspiring ideas for future research.

Nitra, September, 2019

Peter Chrenek
